Article 5 - Rate calculation method

The rates are based on a kg-sliding scale per shipment and are calculated in euro (€). Exceptions in consultation and any other rate structure will take place to a maximum of 2 decimal places.

5.1 Paying weight

The paying weight determines the weight sliding scale applicable to the quote. The paying weight can be determined by taking the highest weight per goods line of:

- the actual gross weight
- the volume weight, which can be determined on the basis of the following premises:

EU countries:

1m ³	= 330 kg	Applicable to individual packages
1 metr ładowny	= 1750 kg	Applicable to pallets and LTL/FTL shipments

Boxes (package):

1-5 packages	Max. weight 25 kg per package Max. 5 packages separately	Calculation based on cubage: length x width x height x 330 kg
>5 packages	Provide on plt	Calculation: see "Pallets"
package >25 kg	Provide on plt	Calculation: see "Pallets"

Pallets:

Pallets	Max weight 1,000 kg (with exception of IBC). Max height of 2.20m	Calculation based on loading meters: (length x width) / 2.4 x 1,750 kg
Stackable*** pallets	Max. weight 500 kg Max. height 1.20m	Calculation (l x w) / 2.4 x 1,750 kg / 2

Bundles/Crates:

Bundles ≤ 2.40 m	Max. weight 25 kg	Calculation: see under Boxes
Bundles ≤ 2.40 m	Weight > 25 kg	Calculation: see under Pallets
Bundles > 2.40 m		Calculation: see above + surcharge (see 5.2). Different departure days and transit times may apply

Calculation payable weight shipments for LTL shipments (>2 loading meters and < FTL): for the calculation of the payable weight of LTL shipments, we assume Euro pallet and/or block pallet sizes. In case of other sized pallets, the length and width of the pallet is rounded up to 0.8/1.2/1.6 meters. Empty space next to the pallets where no standard pallets can be placed will be included in the calculation

***** Definition of stackable:** All standard pallets (hpal, block and euro pallet sizes) may be indicated as stackable, if they do not weight more than 500 kg and are not higher than 1.20 m. LTL/FTL shipments and/or other pallet sizes will have to be delivered stacked per 2 pieces to be invoiced as stackable (if odd number of pallets then round up to whole pallet places). Stackable means that it is possible and allowed to place a pallet on top of the stackable pallet by us as a carrier without causing an increased risk of damage during transport. Distribution Netherlands shipments and shipments for C.I.S. countries** are not allowed to be stack.

Article 7 - ADR goods

Mainfreight Poland Sp. z o. o. transports ADR goods with the exception of classes 1, 2.3, 5.2, 6.2 and 7 and a number of goods which are subject to the security provisions, these can be found in Appendix 1.

Any hazardous materials shipped must be in compliance with all legal requirements on such materials. The client is responsible for correct labeling (also for labeling on the outside of the truck) approved packaging, the transport document and sender's declaration. The goods must be properly packaged and secured on pallets. Loose boxes with ADR goods must always be palletized. If the shipment contains a dangerous substance, notify the UN number and the name of the hazardous material in question in the assignment to Mainfreight Poland Sp. z o. o. If the above guidelines are not met, a fine of € 50 per shipment can be awarded. Due to legally imposed ADR / IMDG restrictions and the prohibition to load certain UN codes together, the transit time of your shipment may differ from our standard transit time.

If no separate arrangements are made, the ADR surcharge is automatically billed at the moment that a consignment is classified for the ADR. No surcharge is billed for shipments that fall under the "Limited Quantities" rule, except when these shipments also will be transported by sea. In that case, a surcharge (IMDG) is applicable. For options and rates please contact Mainfreight Poland Sp. z o. o.

Article 8 - HACCP and conditioned transport

In connection with statutory requirements for hazardous substances, the client must explicitly state in the notification that food-related goods (HACCP) are concerned. If the goods offered differ from packaged unconditioned merchandise, be sure to align them with Mainfreight Poland.

Article 9 - REACH (Registration, Evaluation, Authorisation and Restriction of Chemical Substances), European Chemicals Regulation (Regulation 1907/2006/EC)

REACH is applicable to every company producing, importing, distributing or using chemicals, preparations and/or objects using chemicals in the European Union. Mainfreight Poland Sp. z o. o. does not have end responsibility for REACH and cannot be classified as importer under REACH. The final responsibility for compliance with REACH remains with the client. Consequently, Mainfreight Poland Sp. z o. o. assumes that the client itself complies/will comply with the obligations under REACH. When a consignment subject to REACH is registered with Mainfreight Poland Sp. z o. o., the REACH registration number must be notified to Mainfreight Poland Sp. z o. o. as follows:

"REACH:" followed by the registration number.

Substances for which registration numbers cannot be given or are not found on the list cannot be accepted for handling by Mainfreight Poland Sp. z o. o.

Transport is not covered by REACH and is another legislation. Mainfreight can only submit declarations on behalf of the client (exporter) as direct representative of the client (exporter) for export or re-export.

The following conditions apply:

If desired, the Mainfreight can arrange for supplemental insurance at very competitive rates. For the options and rates, contact the Insurance division of the Mainfreight.
